

Driving Excellence With Data & AI

We build AI systems, data infrastructure, and custom software that turn raw data into measurable business outcomes.

THE PROBLEM

Businesses are sitting on untapped data potential

01 Data Silos

Critical business data is fragmented across spreadsheets, chat threads, and legacy systems — unutilized, invisible, and impossible to act on at scale.

02 Revenue Leakage

Missing out on high-value revenue gains by not leveraging custom predictive models and target AI analytics tools.

03 Slow Decisions & No Automation

Manual reporting with zero automation means leadership gets yesterday's numbers — too late to act on live market signals or trigger real-time business responses.

04 Build vs. Buy Paralysis

Off-the-shelf tools don't fit complex operational workflows, while custom development is slow and risky.

WHO WE ARE

A boutique data & AI engineering firm

Infinity Tech builds AI systems, data platforms, and custom software that create real, measurable business outcomes — from startup MVPs to enterprise-scale transformations.

16+

YEARS OF
EXPERIENCE

30+

PROJECTS
DELIVERED

8

INDUSTRIES SERVED

Formerly **Infinity Analytics Consulting** — trusted by teams across Fortune 500s and high-growth startups globally.

LEADERSHIP

World-class founders, proven track record

FOUNDER

Aayush Mahendru 

Cornell University alumnus. 16+ years scaling data science functions. Converts complex AI/ML analytics models into business growth strategies.

Coinbase · Head of Data Science (Intl)

LinkedIn · Data Science Manager

eBay · Sr. Scientist

FICO

Directi

CO-FOUNDER

Aditi Vad 

Cornell CS graduate. 16+ years in technical product management and system engineering. Bridges deep architecture with scalable product strategy.

Amazon · Sr. TPM, Prime Video India

Hotstar · Sr. PM, Living Room TV

PayPal · TPM

eBay

WHAT WE DO

End-to-end technology services

Agentic AI & Gen AI

Custom LLMs, RAG pipelines, AI agents and automation workflows tailored to your operations.

Predictive Analytics & ML

Churn models, propensity scoring, demand forecasting, and BI dashboards that drive real decisions.

Data Engineering

Lakehouses, ETL/ELT pipelines, data quality frameworks and governance at production scale.

Software Development

Enterprise APIs, web apps, and cross-platform mobile — built for scale and long-term reliability.

Cloud & DevOps

Resilient, cost-efficient infrastructure with automated CI/CD and enterprise-grade security baked in.

UI/UX Design

Intuitive, beautiful product design — from user research and wireframes to pixel-perfect delivery.

HOW WE WORK

Flexible engagement models

Partnering options designed to fit your team structure, budget, and timeline.

01 Project Ownership & Delivery

Full end-to-end delivery of complex products, data infrastructure, or custom AI models built by our dedicated team on time.

02 Workforce Augmentation

Embed senior developers and data scientists directly into your existing team to unblock delivery bottlenecks and scale quickly.

03 Recruitment Services

Leverage our engineering experience to source, screen, and deliver vetted full-time technical talent directly to your HR team.

04 Employer of Record (EOR)

Global payroll, compliance, and local HR management so you can hire talent internationally without setting up complex legal entities.

INDUSTRIES

Serving **key global sectors**

Delivering AI, data science, and software systems across diverse verticals.

- FinTech & Banking

- Healthcare & Pharma

- E-Commerce & Retail

- Automotive & Fleet

- HR Tech & Recruitment

- Media & Entertainment

- SaaS & Cloud Platforms

- CPG & FMCG

PROVEN RESULTS

Real impact, measurable outcomes

PHARMA · AI

FDA Dossier AI Pipeline

10,000+ pages compiled automatically into regulatory-compliant dossiers with 95% automation.

16w → 2w

AUTOMOTIVE · ML

Lead Scoring & Voice AI

Credit propensity model + LLM telephony agent to pre-qualify leads before human agents call.

+18% Revenue

HR TECH · AI

AI Evaluation Engine

AI generates custom assessment forms by role/seniority, scoring candidates instantly.

4h → <2min

E-COMMERCE · ANALYTICS

ROAS Optimization

Real-time clickstream attribution linked ad spend to checkouts, cutting 22% of wasted budget.

1.3× ROAS

HR TECH · DATA

Automated Reporting Platform

End-to-end pipeline replacing manual candidate reports with self-service interactive dashboards.

90% Time Saved

E-COMMERCE · ML

CRM Reactivation Model

ML-based dormant user profiling converted inactive shoppers via targeted reactivation campaigns.

11× Conversions

LIVE PROTOTYPES

We build fast. See the proof.

Interactive, production-grade prototypes built by our team to demonstrate execution speed.

PROTOTYPE 01 · FINTECH

Fleet Ledger & Settlement Portal

Auto driver payments, live settlement tracking, Hindi & English support. Billing disputes cut by **80%**.

[Launch Demo >](#)

PROTOTYPE 02 · FLEET OPS

Unified Fleet Operations Portal

20+ workflows — camera inspections, rent tracking, workshop logs. Check-in time cut by **75%**, zero disputes.

WHY US

Why Infinyty Tech

16+

Senior-Led Execution

Every engagement is led directly by our founders, bringing 16+ years of engineering experience from Coinbase, LinkedIn, Amazon, and PayPal to your project.

Outcome-Focused

We measure success in business impact — not lines of code. Every deliverable is tied directly to a key metric that matters to your stakeholders.

Speed Without Compromise

From definition to working prototypes — our lean engineering team ensures direct communication and rapid execution cycles compared to big firms.

Full-Stack Capability

From raw data pipelines to polished user-facing AI applications — we run as one unified team, eliminating vendor overlap and communication gaps.

LET'S TALK

Ready to turn your data into **your biggest advantage?**

Book a no-obligation discovery call. We'll map out exactly where AI and data can move the needle for your business.

Get in touch

We typically respond within 24 hours.
